EDUCATION

Cornell University

B.S. Information Science; Minor in Business

Ithaca, NY

Expected May 2028

Relevant Coursework: Data Structures & Algorithms, Statistics and Applied Probability, Linear Algebra, Design & Development with Python, SQL & Relational Databases, Web Development, Introduction to ML

Scholarship: Dorothy Young Memorial Scholarship

TECHNICAL SKILLS

Languages & Frameworks: Python, Java, JavaScript, TypeScript, SQL, React, Vite, Vitest, Bootstrap, HTML/CSS

Data & Databases: PostgreSQL, Supabase, pandas, NumPy, scikit-learn, Excel

Developer Tools: Docker, Git, GitHub, GitHub Actions, REST APIs, Jupyter Notebook, Netlify

EXPERIENCE

Software Engineer Intern

May 2025 – Aug. 2025

Donyma Steel Complex

Kumasi, Ghana

- Reduced page-load times by approximately 20%, measured in product analytics, by redesigning React dashboard and navigation screens for an application serving thousands of customers.
- Replaced duplicated UI code with 15+ reusable React components across 10+ screens, allowing shared interface changes to be implemented once and reused throughout the application.
- Resolved critical interface and data-flow defects by integrating REST APIs and normalizing server responses, eliminating incorrect data rendering for hundreds of customers.
- Prioritized interface improvements and bug fixes for weekly sprints using Python analysis of user-interaction data.

IT Client Services Assistant

Jan. 2026 – Present

Cornell SC Johnson College of Business

Ithaca, NY

- Resolved device, software, and connectivity issues for faculty and staff while handling approximately 10–15 daily Windows and macOS help-desk and walk-in support requests.
- Delivered workstations ready for faculty and staff onboarding by configuring hardware, installing and testing required software, and preparing account access before deployment.

PROJECTS

Resolve | Guided IT Troubleshooting

[Live Site](#)

- Built a React and TypeScript helpdesk app that guided users through IT diagnostics and handed structured tickets to technicians, with an administrator editor for maintaining troubleshooting paths.
- Implemented PostgreSQL functions to validate diagnostic answers and persist session progress; used Supabase authentication and row-level security to restrict access by user role.
- Defined a shared TypeScript API contract for demo and Supabase adapters; added Vitest and pgTAP checks with GitHub Actions to validate application behavior and database integrity before deployment.

Layer | Personalized Weather and Clothing Guidance

[Live Site](#)

- Developed a React and JavaScript app that combined Open-Meteo forecasts, personal comfort profiles, and activity inputs to generate clothing recommendations tailored to the user's planned outing.
- Implemented device-local profiles with optional Supabase/PostgreSQL persistence and a queue for retrying failed feedback writes, preserving pending updates through temporary connection failures.
- Separated weather, personalization, and synchronization logic into modules; added Vitest regression checks and a GitHub Actions workflow to test, build, and deploy the app to GitHub Pages.

LEADERSHIP, RESEARCH & PROFESSIONAL DEVELOPMENT

AI4ALL | Selected Participant

2026

- Selected from a pool of 4,000 applicants for introductory AI/ML training and career development mentorship from industry professionals; contributed Python analysis and modeling to a team tweet-classification project.

Predictable Prose, Cornell University | Undergraduate Researcher

Aug. 2026

- Annotated and reviewed 20 research dataset entries per week for a Cornell study comparing LLM and human predictions of plot reveals in detective fiction, supporting analysis of narrative predictability.

Future Civilisations Society (FCS) | Web Lead & Financial Coordinator

Jan. 2026 – Present

- Built and maintained the club's conference website in JavaScript, HTML, and CSS, supporting 40+ attendees; coordinated budget allocation across programming, marketing, and logistics.

Cornell Dining | Student Manager

Feb. 2025 – Present

- Promoted from Dining Associate to Student Manager; supervised a team of 15 student staff per shift and supported hiring, scheduling, and onboarding to uphold service and food safety standards.
